

Solutions for the Rubber Industry

Univar's Rubber Industry Group is a specialised supplier to the rubber compounding and processing industries.

With over 40 years experience of serving the rubber industry's changing needs, our service focus has evolved in tune with our customers' requirements. We have continuously extended our supply base to provide customers with a single source of materials,

and our materials knowledge and industry experience enable us to provide a complete supply chain management process that also complies with regulatory requirements.

Materials Knowledge

Our materials knowledge and industry experience, as a provider of the most comprehensive range of products currently available in the marketplace, ideally positions us to assist customers in all aspects of their supply chain and regulatory requirements. We provide them with a complete chemicals solutions resource, thereby allowing them to concentrate on their core manufacturing and marketing competencies.

In addition, our supplier partnerships with world-class producers such as: Bayer, Cancarb, Dow Corning, GLCC, Kraton Polymers, Pechiney, Rhein Chemie, Solvay and Uniqema allow us to deliver advice based on the latest polymer and additive technologies.

Comprehensive Product Supply

Our product portfolio comprises a comprehensive range of synthetic rubbers including both general-purpose grades and special purpose rubbers for the most technically demanding applications.

These products are complemented by a broad offering of chemicals, in all categories, used in the processing of rubber compounds.
