

Solutions for the Construction Industry

The Univar Construction Group is a specialist supplier of products to the building chemicals, polyurethane, adhesives and sealant industries.

As you would expect from a market leader, the group has a comprehensive offering of products and services, as well as a thorough understanding of the industries' needs, both from commercial and technical viewpoints.

Our construction team consists of a professional staff with many years of experience in the adhesives and sealants, polyurethanes and construction industries. They are backed by a technical service team supported by full laboratory facilities. This is just one area in which we have anticipated our customer requirements for the future.

The laboratory facilities are equipped to carry out initial product recommendations, cure profiles, application development and testing programmes. We offer products from major blue chip organisations that include: Air Products, Cabot, Dow Chemical, Dow Corning, Kraton and Millennium.

Through our industry expertise, we can offer a comprehensive range of both commodity and speciality products used in the following key sectors:

- Adhesives and sealants
- Construction products and building materials
- Polyurethane-based products

Solutions for the Construction Industry

Complete range including:

- Acrylic emulsions
- Catalysts
- Cellulose thickeners
- Epoxy resins, curing agents & diluents
- Fillers
- Flame retardants
- Fumed silica
- Isocyanates & polyols
- Latex emulsions
- Molecular sieves
- Oligomers & monomers
- Pigments
- Plasticisers
- Polyisobutenes
- Polymer modifiers
- Polymer powders
- SBR dispersions
- Silanes/siloxanes/siliconates
- Thermoplastic polymers
- Titanium dioxide
- Water repellents
- Full range organic & inorganic 'general' chemicals

Having established your requirements, we have the capability of supplying the product in bulk, drums, pails or according to your special requirements, from a network of ISO 9001:2000 accredited sites around the country.

From our strategically located distribution centres we can deliver to any reception point in the UK.
