

Dow Corning® IE-2404 Emulsion

A new co-binder to enable production of paint and facade render with excellent weatherability and water resistance performance.

Dow Corning IE-2404 Emulsion provides core benefits, such as UV stability, repaintability, uniform appearance, and damage resistance.

- Low water absorption.
- Increases permeability to water vapor
- Extends coating life.
- Disperses readily in water.
- Reduces dirt pickup and other core benefits

IE-2404 Emulsion also can be used to develop coating systems that require less maintenance, last longer and protect porous substrates better than traditional coatings.

For more information about Dow Corning IE-2404, visit www.dowcorning.com/IE2404 and for even better beading and water repellency, use IE-2404 with [Dow Corning® Z-70 Emulsion](#).
