New Foam Control Agents

Univar® PA 20 A, a cost effective silicone antifoam emulsion, for high decorative applications aimed to minimize foam. Normally Univar® PA 20A will not create craters, pinholes and other surface defects.

No VOC, APEO free

Vanquish: Mineral oil foam control process aids

A new cost effective and easy-to-disperse bubble release foam control process aids for coating from Ionic Solutions.

Vanquish C986 and **Vanquish 1226** (silica containing) are blends of non-ionic surfactants and hydrophobes in highly refined mineral oil, designed for moderate and high PVC system.

Vanquish C1193 is a mineral oil free emulsion of high molecular weight polymer glycol derivatives, designed to have a negligible effect on gloss.

These new products extend our existing range of foam control agent of polyol from Dow, silicone based from Dow Coning and Silicone based, molecular defoamer from Air Products.
