## REACH Bulletin 7 Pre-Registration

Dear Customer,

Univar continues to work alongside manufacturers / importers to ensure continued availability of chemicals for our customers. Our preparation for pre-registration is in hand and as the pre-registration window is now open it remains our intention to ensure all substances we manufacture or import are pre-registered.

We can report that nearly all of our suppliers have confirmed their intention to pre-register the substances they supply. However, should Univar become aware of a substance that is not going to be pre-registered we will let our customers know as soon as possible. In this unlikely event, Univar will look to resource the particular substance and/or work with the individual customers to identify suitable alternative substances.

During the pre-registration window, Univar will remain in close contact with all our manufacturers and importers to ensure that your expectations as a customer are met.

Finally, Univar understands that some customers will have put in place administrative processes to monitor the REACH readiness of particular chemicals they source from Univar. Univar appreciates that these processes may be burdensome and to help ease these we will proactively report to customers on exceptions only.

Should you require any more information please contact us via your usual Univar contact or using the e-mail the link below:
