

Through our sustainability programme, **U**stainability, we are committed to reducing our environmental impact and carbon footprint, ensuring the safety of our employees and neighbours, helping to grow our supplier and customer businesses by providing them with sustainable solutions and ensuring the safe stewardship of products.

Ustainability builds on Univar's existing pioneering SHE programmes in Europe, Middle East and Africa, such as the widely recognised **U**, and integrates these into the broader Univar Sustainability programme, covering the whole value chain from our suppliers to our customers.
