

Engineering Polymer Excellence

A NEW FORCE IN PLASTICISERS

Hyperlast Limited is recognised as a new force in polymeric plasticisers for PVC, nitrile rubber and synthetic lubricants. We have manufactured polymeric plasticisers for many years, growing stronger by building on our experience and incorporating the strengths and technical knowledge of other former well-known producers of polymeric plasticisers. Recently extended, the product range we offer is now unparalleled within our chosen area of industry.

From our state-of-the-art production reactors at Birch Vale in the beautiful heartland of the Peak District - one hour from Manchester airport - Hyperlast dispatches quality products all over the globe.

Our commitment to quality processes and services has enabled us to achieve the ISO 9000 standard, and we continue our programme of progressive improvement.

COMMITMENT TO PROGRESS

Hyperlast identifies customer needs and offers industry-focused product solutions based on many years of applied

expertise. Our final objective is to help our customers gain competitive advantage in their industries. Similarly, we are continually improving our own manufacturing processes to improve technical specifications in line with market requirements.

BESPOKE PACKAGING, DEDICATED SUPPLY LINES

Hyperlast offers packaging to cater for the needs of our customers. And whether in drums, IBCs or bulk tanker loads, we propose a flexible logistics package to suit all requirements – from trial quantities to contract bulk supply across all frontiers.

SAFETY, HEALTH & THE ENVIRONMENT

It is company policy to manufacture and deliver products and services in a manner that:

- ensures the health, safety and welfare of its employees and end users.
- is not detrimental to the environment, either within or outside the boundaries of the company's operations.

The company is committed to the highest standards of health and safety and to the protection of all areas of the environment that may be affected by its activities, in full compliance with all legal requirements.

The company's SH&E management system sets objectives for continuously improving the performance of products, services and operations.

Hyperlast Ltd – Engineering Polymer Excellence!

Hyperlast Limited is part of the market-driven, technology-based British Vita Group. In our own right, however, we have world-wide recognition as specialist designers and manufacturers of polyurethane solutions for all industry sectors.
