

UNIVAR INC. HAS SHOWCASED ITS OWN RANGE OF NEW NATURAL AND BOTANICAL PRODUCTS

Univar Inc. has showcased its own range of new natural and botanical products which complement its comprehensive portfolio of personal care ingredients. New launches from several of Univar's key partners, such as Dow Corning and Dow, were on display as well. One area Univar was focusing on is highlighting to its customers the exceptional advantages of combining top quality natural and chemical ingredients. It was presenting a number of exciting formulations that demonstrate this including "Eternal Exotic Tattoo", which was on display at the exhibition's "Innovation Zone". This novel formulation, with outstanding durability, colour intensity and a glamorous look, combines the unique properties of silicones (including a brand new resin with extra-long lasting effects) with two natural ingredients which provide nutritive benefits as well as a natural source of antioxidant.

"Last year we saw some exciting developments
