

## Univar REACH self-service database

To assist you in your REACH enquires, Univar have developed a self-service web-portal tool to allow you to look at the REACH status of products we supply.

The database can be accessed from our main website address [www.univareurope.com](http://www.univareurope.com) following the REACH links from the main page.

The image displays three sequential screenshots of the Univar website, illustrating the navigation path to the REACH self-service database. The first screenshot shows the main website with a blue arrow pointing to the 'REACH' link in the top navigation bar. The second screenshot shows the 'REACH' page with a blue arrow pointing to the 'REACH Helpful Tools' link in the left sidebar. The third screenshot shows the 'Univar REACH System' search page with a blue arrow pointing to the search input field.

**Univar REACH System**

Search for a Chemical

Search:

Chemicals

Chemical Name	Exemption Code
CHEMICAL CO 19 20179	08
CLEARCEL CP 30AC	08
CLEARCEL CP 30AC	08
CLEARCEL CP 30AC	08
CLEARCEL CP 30AC	08

In the Search page you can enter the chemical name or the product name; partial names may be used to restrict the selection to products of interest.

The names that match your search will be shown in the box marked 'Chemical'. Click on the 'Select' link to open the report or on the numbers on the bottom of the box for more results.

The report will open a PDF document with the product name, other identifiers such as registration numbers, exemptions, registration deadlines and generic exposure scenarios where available.

The information will be updated as we receive further details from our suppliers.
